

Lecture Code : HVB01-S4

Session Name : Hypertension and Vascular Biology

Session Topic : -

Date & Time, Place : June 19 (Thu) / 15:00-17:00 / Room 2 (GBR 102)

Intensive BP Control in CKD Patients

Elaine Ku

UCSF, United States

The objective of this lecture is to review the evidence as it relates to intensive BP control in patients with chronic kidney disease, with a focus particularly on the role of intensive BP control in those with advanced chronic kidney disease, and how to achieve blood pressure targets in this population.

Keywords: hypertension , CKD, RAS inhibitors, cardiovascular disease , guidelines
