

Shaping Tomorrow's Nephrology: **Insight-Driven Kidney Care**
KSN SEOUL, KOREA
2026
The 46th Annual Meeting of the Korean Society of Nephrology

Jun 11(Thu) – 14 (Sun), 2026
COEX, Seoul, Korea

Lecture Code : IS05-S1

Session Name : Industry Symposium 5 (Daewon)

Session Topic : Industry Symposium 5 (Daewon)

Date & Time, Place : June 12 (Fri) / 12:00-12:40 / Room 3 (GBR 103), 1F

Clinical Efficacy and Evidence of Renamezin in CKD & DKD

Cheol Ho Park

Severance Hospital, Republic of Korea

Chronic kidney disease (CKD) is a major public health concern, and the prevalence of CKD is steadily increasing. CKD not only diminishes patients' quality of life but also elevates the risk of cardiovascular complications and premature death as kidney function declines. Socially, CKD imposes a significant economic burden by driving up healthcare expenditure. To alleviate this disease burden on both individuals and society, a variety of therapeutic agents have been developed and utilized. In this lecture, we will review how the oral spherical carbon adsorbent, Renamezin, can benefit patients with CKD based on currently available literature.

Keywords: Chronic kidney disease, Oral spherical carbon adsorbant, Renamezin
