

Shaping Tomorrow's Nephrology: **Insight-Driven Kidney Care**
KSN SEOUL, KOREA
2026
The 46th Annual Meeting of the Korean Society of Nephrology

Jun 11(Thu) – 14 (Sun), 2026
COEX, Seoul, Korea

Lecture Code : HV01-S4

Session Name : Hypertension and Vascular Biology

Session Topic : Hypertension and Vascular Biology

Date & Time, Place : June 13 (Sat) / 08:30-10:10 / Room 3 (GBR 103), 1F

RNA Interference: A Novel Strategy in the Management of Hypertension

Cheol Ho Park

Severance Hospital, Republic of Korea

Hypertension is an exceptionally common comorbidity in patients with chronic kidney disease (CKD), and it is well-established as a critical risk factor for both the decline of renal function and the development of cardiovascular complications. In this lecture, we aim to discuss precise and leading management strategies for optimal blood pressure control in CKD patients. Our discussion will be based on the underlying principles and clinical trial outcomes of RNA interference (RNAi), which has recently garnered significant attention as an innovative therapeutic approach.

Keywords: Chronic kidney disease, Hypertension, RNA interference
